

Holistic Management Training sessions

Holistic Management is a decision making process that considers the ecological, economical and personal impacts of that decision.

Instructors will be a variety of the best HM Certified Educators. They will come from across the country to provide their insight and knowledge to you. This is an exceptional opportunity to learn from some of the “best of the best” Holistic Management Practitioners and Instructors.

May 28-29 - Introduction to Holistic Management - Holistic Management Concepts. 4 Key Insights. Decision Making and Ecosystem Processes. Testing and Management Guidelines. Planning Procedures and Feedback Loop.

June 18-19 - HM Financial Planning - Learn how to plan to make a healthy profit every year. Know how to financial plan. Learn how to determine which enterprises will yield the greatest return. Learn how to use testing questions. Learn how to monitor your plan.

July 30-31 - HM Grazing Planning - Innovative grazing planning techniques for maximizing stocking rates and improving land health. A new perspective on overgrazing and over-rest and their effects on your land. Practical management guidelines for increasing land productivity.

August 20-21 - HM Biological Monitoring - Simple and effective biological monitoring techniques. Learn new ways to work with Nature to create the results you need and want.

October 8-9 - HM Land Planning - How to develop the best possible plan for the physical infrastructure of your property so you can handle livestock in the most economical and practical way. How to develop the ideal infrastructure ties into your grazing and financial plans, to ensure profitability, at each step along the way. How to minimize the cost of infrastructure you do put in, such as fencing, waterpoints, and handling systems.

November 5-6 - HM Policy Analysis and Design - How to diagnose a natural resource issue. How to diagnose a social or economic issue. How to analyze a policy or project. How to design a policy or project that will effectively address issues. How to use policy or project design and analysis in a variety of contexts.

Attend all or pick and choose: Cost will be \$250 for one session, \$225 per session if you attend 2 sessions, and \$175 per session if you attend 3 or more sessions. Additional participants from the same family or operation can attend for \$50 per session. Class size limited to 30 people per session. All sessions will be held in **Bolivar, Missouri**. Hotels are conveniently located nearby. Sponsored by the Green Hills Farm Project a non-profit landowner-based organization which promotes family-owned, sustainably-managed agricultural operations.
